Vehicle								
Northern Gun Samson Power Armor								
An Armored Infantry Assault Suit, this power armor has a rail gun and a pair of mini-missiles added on to a ground based suit of armor. The armor is about as tough as a Coalition SAMAS armor, but not as fast instead relies on it's operators to fight smarter. For more information on the NG-XP Samson Power Armor, Refer to the Rifts First Edition Book - Page 212. Modified with a Naruni N-F20A Medium Force Field (75 M. D.C.)								
Big Boss ATV								
For her second vehicle, the Big Boss ATV provides a great balance of everyday utility and anonymity. There is enough room to fit the rest of the gear, including the Samson if not being worn and still squeeze in one passenger. It also has a sun roof where the NG-P7 can be mounted for use while driving. Additional information on the Big Boss ATV may be found in the Rifts First Edition Book - Page 227.
